

# COMMUNITY GARDEN / GARDENERS WANTED

A community garden is a parcel of land that has been divided into individual garden plots. Capital Roots transforms neglected private and public land into vibrant, food-producing spaces that beautify our cities. Gardeners are needed to plant and maintain their own personal plot of land. Plant your choice of approved fruits, veggies and flowers for your benefit. Learn how to register to grow your own, produce, get tools, supplies and more. Only a small sliding scale fee to register.

Capital Roots has a number of locations in the Capital Region, visit their website for more information on locations and how to sign up.
